## Q1-Q6 Kepler Object of Interest Table (koi\_q1\_q6) Delivery Log

Date	Comment
2013-02-12	<p>Final delivery of the Q1-Q6 KOI activity table. This table combines the planet candidate appendix table of Batalha et al. (2013, ApJS, 204, 24) and the July 2012 False Positive table previously hosted at MAST. Two candidates were in both tables, K01902.01 and K02259.01. The two KOIs are given a disposition of Planet Candidate in this KOI table. Their ephemerides, planetary and stellar information are pulled from the Batalha et al. (2013) appendix and their false positive information is pulled from the False Positive table.</p> <p>This table is considered DONE; no further work will be done on this activity.</p>
